

ACT Boot Camp for Science Teachers

In order for students to benchmark on the science portion of the ACT, they will need regular experiences that require:

- Reading complex texts
- Analyzing data
- Analyzing opposing arguments

In this two-day session, participants will:

- Practice strategies for accessing complex texts, analyzing data, and analyzing opposing arguments
 - Develop tasks requiring these key processes
 - Analyze student work samples to identify problem areas
- Teachers will experience the kinds of learning they will want to provide for their students.
