

Mathematics Teaching and Learning Profile Informational Summary

Your school will be participating in a *Mathematics Teaching and Learning Profile*. The profile will provide the school with an overall picture of the mathematics instructional program and recommendations for improvement.

A review team from the Partnership Institute for Math and Science Education Reform (PIMSER) will visit the school to conduct classroom observations and interviews with students, parents, teachers of math, and the principal. In addition, teachers and principals will complete online surveys about their roles in the mathematics program. The review team will then analyze all collected data and develop a comprehensive report.

Principal

Complete online survey

Participate in a one-on-one interview with review team

Schedule group interviews for reviewers with teachers, students, and parents

Teachers

Complete online survey

Complete Class Pre-Observation Form in preparation for classroom observation by the review team

Participate in a teacher group interview with review team

Students

Participate in a student group interview with review team

Parents

Participate in a parent group interview with review team
